Frequently Asked Questions Examination grades in summer 2019

1. How are GCSE examination grades changing?

This booklet summarises which examination board and specification your daughter is following in each of her subjects and whether these lead to a GCSE or IGCSE qualification. As you may be aware, GCSE and IGCSE specifications are in the process of being reformed. One of the changes associated with these reforms is that exams are in the process of moving from a grading system based on letters (from A* to G) to one based on numbers (from 9 to 1 where 9 is the highest grade).

2. Will my daughter receive letter grades or number grades?

Subjects are being reformed on a phased basis, spread over several years. This means that in summer 2019, when your daughter will receive her GCSE results, they will get number grades for most subjects and letter grades for IGCSE English Language and IGCSE English Literature. This is shown in the far right column in the summary table which follows in this booklet.

3. How does the new number grading system match the letter system?

The new number system will not be directly equivalent to the letter system. However, to give meaning to the new number grades, Ofqual (the non-ministerial government department which regulates qualifications, examinations and assessments in England) has decided there will be some comparable points between the two systems, as shown in the diagram to the right. Very broadly this should mean:

- Approximately the same proportion of pupils across the nation will achieve a grade 7 and above as would achieve a grade A and above.
- Approximately the same proportion of pupils across the nation will achieve a grade 4 and above as would achieve a grade C and above.

As the new number grading system has more grades (9) than the letter grading system (8), this means that the number grades are not directly equivalent to the letter grades (eg a number grade 4 is not directly equivalent to a letter grade C).

4. As the new highest grade in the number system is a grade 9, will there be nationally similar numbers of grade 9s awarded as there are currently A* grades?

Where there are two of the higher grades for the letter system (A* and A), there are three of the higher grades for the number system (9, 8 and 7). This means that fewer pupils across the nation are expected to gain a grade 9 compared with an A* grade.

5. Will A-levels be changing their grades?

No, A-levels will retain their A* to E grading system.

6. What will universities ask for?

Entry criteria vary between institutions as each is able to set their own entry criteria. Universities will know the context of GCSE reforms when deciding their criteria.
